

Thomas A. Berrueta

CONTACT	tberrueta@u.northwestern.edu	tberrueta.github.io
EDUCATION	Northwestern University, Evanston, IL Ph.D. Candidate in Mechanical Engineering	Harvey Mudd College, Claremont, CA B.S. Engineering, Graduated with Honors
HONORS	<ul style="list-style-type: none">• Microsoft Ada Lovelace Fellowship Finalist (top 20 of 600+ applicants) 2019• Walter P. Murphy Fellowship (Northwestern University) 2017-2018• Harvey S. Mudd Merit Scholarship (Harvey Mudd College) 2013-2017• Dean's List (Harvey Mudd College) 2013-2017	
RESEARCH	Center for Robotics and Biosystems <ul style="list-style-type: none">• I study complex physical systems and their emergent capabilities through the lens of robotics. I look to the physics of self-organization for designing control strategies in settings where most methods fail.• I develop algorithms that identify emergent simplicity and discrete structure arising from the interactions of robot swarms, many-body systems, and human-machine systems.• I derive techniques that simultaneously leverage modern machine learning, control theory, statistical physics, and information theory towards making complex systems controllable.	
PUBLICATIONS	<i>Journal Papers</i> <ul style="list-style-type: none">• P. Chvykov, T. A. Berrueta, A. Vardhan, W. Savoie, A. Samland, T. D. Murphey, K. Wiesenfeld, D. I. Goldman, J. L. INVITED TALKS	<ul style="list-style-type: none"> • T. A. Berrueta, “Online learning in physical systems.” <i>SIAM Dynamical Systems</i>, Symposium on Leveraging Machine Learning for Dynamics and Control, May 26th, 2021, YouTube Video. • T. A. Berrueta, “Low rattling: Predicting driven self-organization.” <i>Center for Robotics and Biosystems Seminar Series</i>, Northwestern University, Dec. 4th, 2020, YouTube Video.
EXPERIENCE	<p>Northwestern University</p> <p>ME314: Theory of Machines - Dynamics Co-teacher (2019), Grader (2018, 2021)</p> <ul style="list-style-type: none"> • Lectured large senior-level course (~70 students) on rigid body dynamics and Lagrangian mechanics. • Redesigned class content and homeworks as it pivoted to an online-friendly format. <p>Harvey Mudd College</p> <p>Kaia Corporation Capstone 2016-2017</p> <ul style="list-style-type: none"> • Designed a MEMS-based laser diode burn-in platform for the testing of optical transceivers, which are crucial to data centers world-wide. • Implemented embedded temperature and current controllers for the microscopic laser diodes. <p>Amazon Lab126 Capstone 2016</p> <ul style="list-style-type: none"> • Designed a hardware platform for testing the voice-responsiveness of the Amazon Echo in various experimental conditions capable of autonomous maneuvering and obstacle avoidance in rooms. <p>Northrop Grumman</p> <p>IR and Visual Control Systems Intern: Survivability Group 2016</p> <ul style="list-style-type: none"> • Developed an infra-red (IR) signature estimator model for autonomous aircraft control, and developed algorithms that optimize aircraft trajectories to minimize IR exposure in real-time. <p>SpaceX</p> <p>Vehicle Engineering Intern: Engine Dynamics Group 2014-2015</p> <ul style="list-style-type: none"> • Modelled and characterized flight environments experienced by M1D and MVacD rocket engines in order to anticipate design failure modes and ensure mission safety.
LEADERSHIP & OUTREACH	<p>Northwestern University</p> <ul style="list-style-type: none"> • Board member of the Northwestern Mechanical Engineering Graduate Student Society (2017-2019). • Organizer of recruitment activities for incoming mechanical engineering graduate students (2018). • Mentor to 8 Ph.D. and Masters students through the department mentorship program (2017-current). • Volunteer at the Chicago Museum of Science and Industry, teaching members of the public about robots and technology (2017-current). <p>Harvey Mudd College</p> <ul style="list-style-type: none"> • Member of the Harvey Mudd College Entrepreneurial Network (2017). • Mentor in the Harvey Mudd College mentorship program (2016-2017).
SKILLS	<p>Technical</p> <ul style="list-style-type: none"> • Professional experience in Python, C++, and MATLAB. • Expertise in control theory and analysis of dynamical systems, as well as machine learning, information theory, statistical physics, and optimization. <p>Other</p> <ul style="list-style-type: none"> • I am fluent in Spanish and English, and conversational in French. • I have played jazz guitar/bass since 2008. • I do music composition and production in my spare time. • I love to run, and ran competitively in an NCAA college track and field team.
NOTABLE PRESS	<ul style="list-style-type: none"> • <i>Science Magazine Podcast</i>, “The uncertain future of North America’s ash trees, and organizing robot swarms,” (2021). • <i>Gizmodo</i>, “Meet the Pint-Sized Robots that Spontaneously Dance,” (2020). • <i>Popular Mechanics</i>, “These Robots Literally Just Flap Their Wings. That’s It. But the Army Loves Them,” (2019). • <i>Scientific American</i>, “Prehistoric Suckers, Slapping Robots and Three Billion Birds Gone,” (2019). • <i>Science Magazine News</i>, “Watch a robot made of robots move around,” (2019).
